

# Polyethylene

## PolyGuard - PE™ Polyethylene

### Low Density Polyethylene (LDPE)

Lightweight yet durable, polyethylene is ideal for food manufacturing, food handling, light industrial, and similar industries where splash protection is necessary. This thin, polymer material is an economical way to keep clothing clean and protected from water based liquids and certain chemicals. The Aprons, Gloves and Sleeves comply with FDA guidelines for food handling. Polyethylene is inherently anti-static with a maximum static decay of 0.5 seconds.

**Applications:** Food handling, food preparation, laboratory, pharmaceutical, medical, dental, industrial, general light splash protection.
