

Finger Cots - Static Dissipative

Applications: Microelectronic, semiconductor, circuit board, electronics, parts handling.

Class 100 Static Dissipative Finger Cots

Class 100 Static Dissipative Finger Cots

These cost-effective finger cots provide excellent protection from skin salts, flakes, oils, and other particulates. Ideal for use in small parts handling where a full glove is not needed.

DI washed powder-free, the thickness of these cots is a mere 3 mil, tissue weight sheer film insuring maximum dexterity and relief from finger fatigue.

Class 100 processed and packed 5 gross per vacuum sealed in static shielded bags.

Features and Benefits

Class 100 Anti-Static Finger Cots

- ▲ Ultimate Tensile Strength lbs/in²..... Not Less than 4,500
- ▲ Ultimate Elongation, %..... Not Less than 800%
- ▲ Service Temp. °F..... -80 to 175
- ▲ Tear Resistance..... Very Good
- ▲ Chloride Level..... Typically Less Than 500 Parts Per Billion
- ▲ Recommended for Use with Class II Static Sensitive Devices.
- ▲ 3mil Thickness
- ▲ Excellent Protection From Skin Salts, Flakes, Oils and other Particulates
- ▲ Ideal For Use in Cleanrooms
- ▲ Class 100 Processed and Packed in ESD-Safe Bags
- ▲ Sizes Small-Extra Large
