

Head Protection

Applications: Construction, machining, milling, industrial, and similar industries requiring head protection.

Features and Benefits

Hard Hat

- Strong HDPE
- Adjustable Suspension
- Fitted for an Optional Chin Strap
- Lightweight

NOGMA™

Head Protection

Hard Hats are available in four colors: white, red, orange, and yellow. A snap lock adjustable headband secures the four point suspension firmly but comfortably for a custom fit. The padded sweatband increases comfort and fit. Made of high density polyethylene for durability and dielectric strength. Surprisingly lightweight at less than 13oz., this cap has attachment slots for face shields and earmuffs. An optional chin strap also attaches easily. The cap has a brim and rain slots for complete protection in any condition. Each cap is individually polybagged with important user precautions printed on the outside. **ANSI approved Z891.1-1997.**

Bump Caps are available in three colors: white, red, and yellow. A snap lock adjustable headband secures the four point plastic suspension firmly but comfortably for a custom fit. The padded sweatband increases comfort and fit. Made of high density polyethylene for basic head protection in low clearance areas. Bump Caps have perforated sides for air circulation and a short brim. These caps are not to be used for protection against falling objects.

Chin Straps can be easily attached to the above hard hat. Made of a nylon strap and plastic chin protector, the length is fully adjustable.
