

Polyester ESD Cleanroom Wipe

Polyester Knit ESD Wipes

PolyPure ESD Polyester Knit Wipes are made from 100% filament polyester with static dissipative fibers to control ESD. The static dissipative fibers attract and dissipate the charge, locking any residual charge into the fiber.

Four edges are ultrasonic cut and sealed. The structural character of the material allows for maximum absorbency and minimal abrasion resistance. These wipes are laundered and double packaged in a class 10 cleanroom. Bags are vacuum sealed. The metallic ion and extractable levels are extremely low. Class 10 compatible and ESD safe.

Applications: Excellent for general cleaning in cleanroom, microelectronic, laboratory, and industrial maintenance where static sensitive devices are present.

Technical Data

● Weight g/m ²	Not Less than 145
● Density g/cc.....	0.303
● Fibers /cm ²	0.19
● Absorbency cc/m ²	440

- 100% Polyester
- Class 10 Cleanroom Laundered
- Double Bagged
- Non-Abrasive

- Available in Two Sizes
- High Absorption
- Low Particle Generation

Polyester ESD Cleanroom Wipe

PolyPure ESD

Product No.	Size	Color	QTY/PK	Packing
CRP0665-9	9"x9"	White with Black Static Dissipative Fibers	150	150 sheets/bag (stacked), 8 bags/case
CRP0665-12	12" x12"	White with Black Static Dissipative Fibers	75	150 sheets/bag (stacked), 8 bags/case

Packaged in Double Sealed Polybags

Additional **UNITEK™** Wipes Include:

<i>CelluClean Polycellulose White</i>	CRP0605
<i>CelluClean Polycellulose Blue</i>	CRP0605
<i>CelluCleanC Creped Polycellulose</i>	CRP0610
<i>PolyPure10 Polyester Wipe</i>	CRP0635
<i>PolyPure10 Ultra Polyester Wipe</i>	CRP0645
<i>PolyPure 1 Polyester Wipe</i>	CRP0655
