

# Wrist Straps

## Electrostat Wrist Straps

**ESD Wrist Straps** effectively provide grounding to eliminate electro-static discharge. The elastic band is made up of non-allergenic polyester fabric. The fabric has silver coated nylon threads and is completely washable. This durable, yet lightweight band will keep its electrical continuity even if the buckle is open. The alligator clamp is removable to expose a banana plug. Fully adjustable and equipped with your choice of a 4mm, 7mm or 10mm solid snap stud for electrical reliability. Cords are available in 6ft, 10ft, or 12ft lengths. Wrist Straps have a 1 meg ohm resistor. Each Wrist Strap is individually bagged.

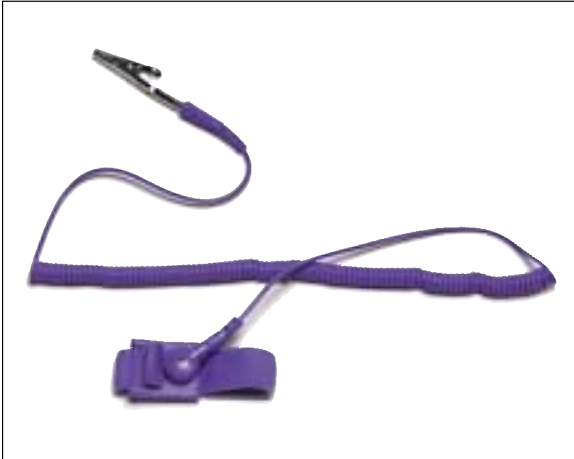

**Applications:** Any manufacturing or handling of ESD sensitive devices such as microelectronics, semiconductors, circuit boards, sensors, and hard drives.
